

## Baggage Cart

The solution for commuter aircraft baggage handling. A push cart designed to assist passengers with loading carry-on luggage.

The Hand Baggage Cart is a push-type cart designed to be staged at the RJ Aircraft passenger boarding door. This allows passengers to place their carry-on baggage directly onto the cart for easier loading into the aircraft baggage compartment.

### Specifications

Dimensions:	6'6" long x 36" wide x 60" tall
Weight:	460 lbs.
Wheel Housing:	7 Gauge Painted Steel
Shelves:	12 Gauge Painted Steel
Ends:	14 Gauge Painted Steel
Top:	14 Gauge Painted Steel
Wheels:	1,200 lbs. Rating on Each
Brake:	Automatic braking system AGE will build to your specifications.

Heavy gauge steel construction makes the HBC a rugged long lasting piece of equipment. Carts are bolted together, so **all parts and panels are easily replaceable**. HBC has the automatic locking brakes that prevent the cart from being blown across the tarmac from prop-wash or high winds. AGE can modify height dimensions to meet your exact requirements.

### Features and Options

The Hand Baggage Cart is designed to handle loads, carrying from 750 lbs. up to 1,000 lbs with no deformation. The center shelf is designed so that water runs to the center seam and is directed out to the ends. Baggage stays drier even in heavy rains.

The Hand Baggage Cart can be offered in stainless steel painted or unpainted. Rubber Corner Bumpers and Reflector Tape is also available. The Auto Lock Brake with a simple handle/ lever system locks both back wheels for better control and stability.
